Our Work

We keep standing tall despite all the loopholes until we get the break-through.
This Is How We Work

Hooley

Events Just Got a lot More Social

Client Type: Event Management
Services: Website, Mobile App, Manager App
**Website:** www.hooleyapp.com

App Intro:

This all–in–one app allows you to plan and attend events in the best possible way. It gives you a great social experience with creative features and tools. Offering you the flexibility in ticket purchasing as well as in gifting geo-fencing. It's effective not only for successful affinity marketing but also for connecting attendees in different industry sectors. With the help of custom-designed dashboards and marketing-focused analytics to target audience, it's easy for the promoters to generate the leads. Hooley's potential to offer you a unique customized social experience increases the app's overall worth in the market.

Events Just Got Virtual

Spottie

Spot, Play & Win! Play Spottie and start meeting other players in real-time!
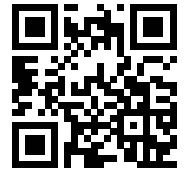

Client Type: Social Gaming

Services: Website, Mobile App

Website: www.spottie.com

App Intro:

Spottie is a free mobile app available in the Google Play Store for Android as well as iOS. This game allows you to meet personally and play in a creative and fun way. Players can get the chance to meet one another, start conversions, and build connections with people they are shy away. We don't use superficial swiping methods in the game. The players can choose the multiplayer game or can freely enjoy playing one-on-one.

Spottie

FIND PEOPLE
SOCIALIZE & WIN
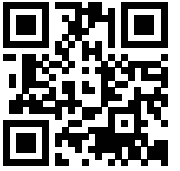

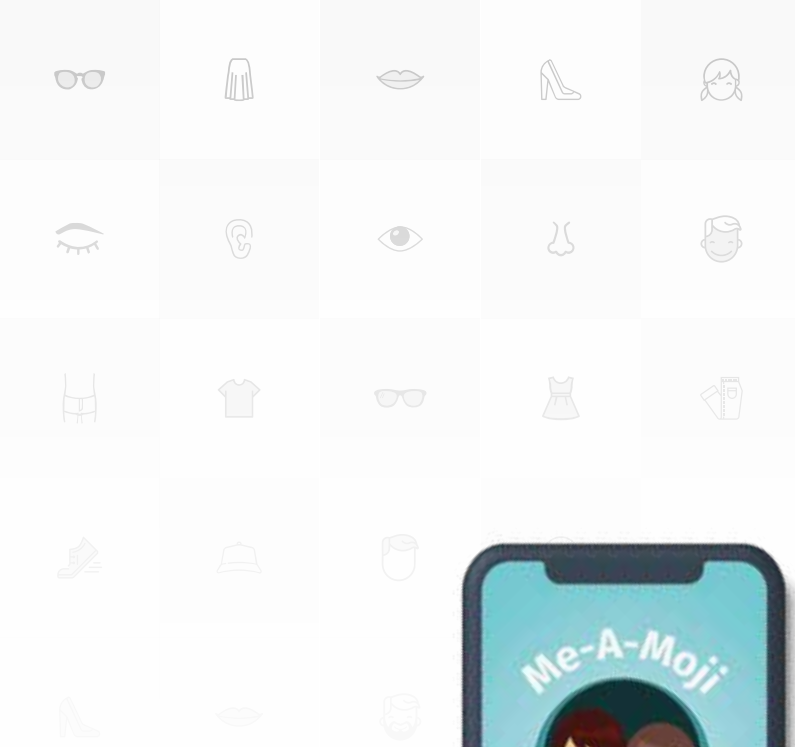

Me-A-Moji

Be Who You Want To Be! Express Yourself!

Client Type: Social Networking
Services: Mobile App
Website: www.meamoji.com

App Intro:

It's fun to personalize your avatars and craft an emoji. The app gives you a choice of customization of nose, eyes, color, and eyebrows of your photos. All tools of the app are fun and easy to use. You can easily entertain yourself and your friends with cartoon robots, animals, ghosts, or aliens that mimic your facial expressions.

Pet-A-Moji

Customize your pets in multiple Avatars

Client Type: Social Networking

Services: Mobile App

Website: www.petamoji.com

App Intro:

If you are a pet lover and want to craft your pet with multiple avatars, then Pet-A-Moji App is the right call for you. With Pet-A-Moji App, you can disguise the appearance of your pet in multiple shades with customization of body parts inclusive of snout, ears, face, tail, patches, and body color. So pick the name of your customized pet and share it with others.

Yes, No, Maybe so

It All Happens With a Quick Swipe!

Services: Mobile App
Website: www.iinshaapps.com

App Intro:

Yes, No, Maybe, So is a social networking Mobile App used to find an opinion from the followers or public against a specific image or video with swipe-right to Yes, swipe left to No, Swipe-Up to Maybe, or Swipe-Down to Skip. Are you looking to retrieve a specific poll against your images or videos from the gallery in real-time, then Yes, No, Maybe, So App is the right call for you to get public interaction. Jump-into this App and gather all the polling statistics from the timeline against all your images.

Anytime Secure

It's all about Evolving with Business, Focus on Success, and Autonomous Scheduling!

Client Type: Meeting Scheduling
Services: Website, Mobile App

App Intro:
Anytime Secure is driven by its mission statement, "A business meeting is the heart of a thriving enterprise." This message resonates with our existing clients. We believe each meeting is a chance to talk about your project face-to-face, set new directions, clarify issues, share ideas, create alignments, negotiate, & influence others. Our High-End technology like AI-Assistant auto-mates the meeting being scheduled by ensuring effec-tive business meetings that start on time and end on time. With purposeful meetings, it is easier for our clients to move business objectives forward productive-ly.
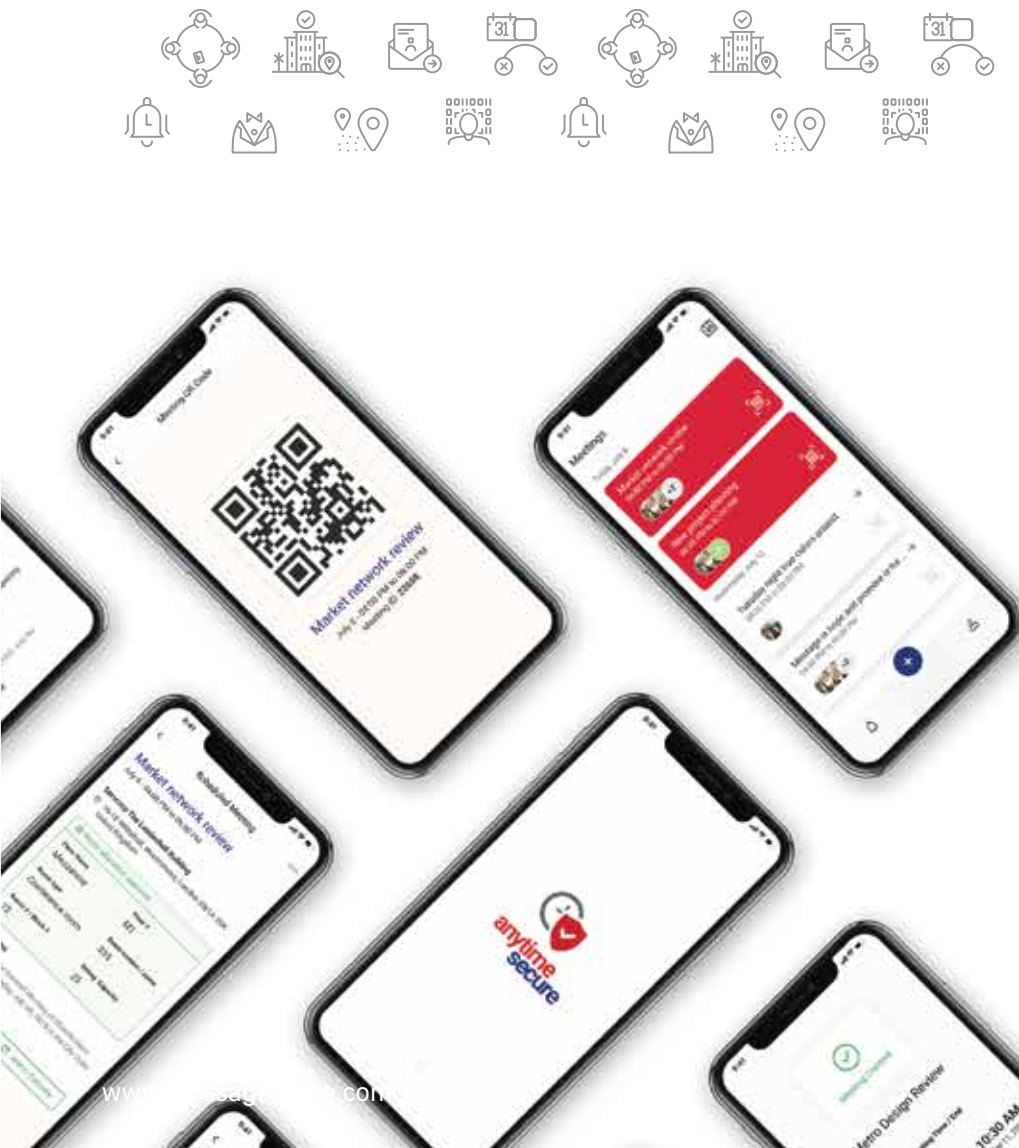

Hahn Labs

Testing has never been so easy, Do It Now

Client Type: Health Care

Services: Website

App Intro:

Hahn Labs is an online testing application devised to conduct tests of food items. The entire testing templates are identified against each food item according to the food levels. An automated sample receiving process revolves around this web-based application. The key progress of this app is its user-friendly nature. The user can log into this App and manage all the testing details inclusive of sample submission and the testing results. An automated Invoice generated against the said test with a QR Code labeled on the test result shows all the test details.

HAHN
LABORATORIES
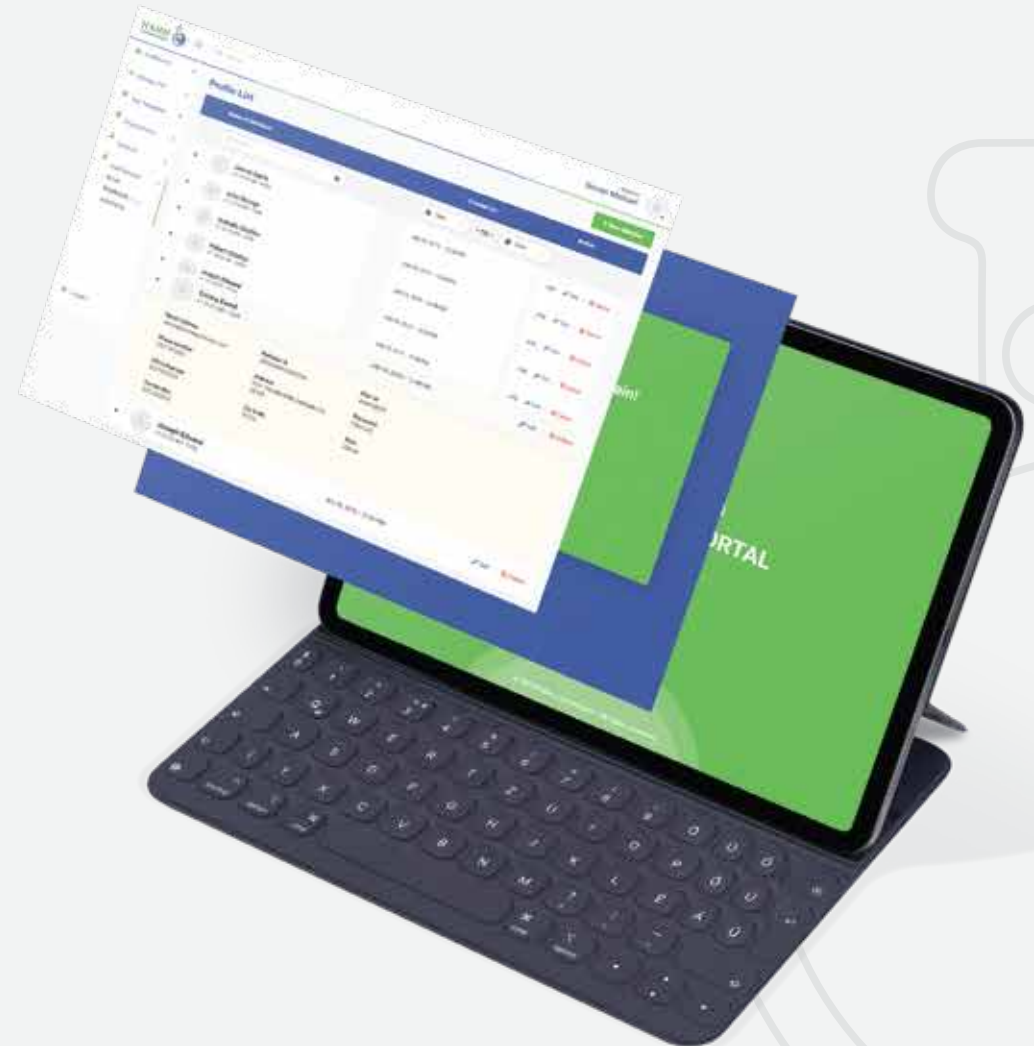

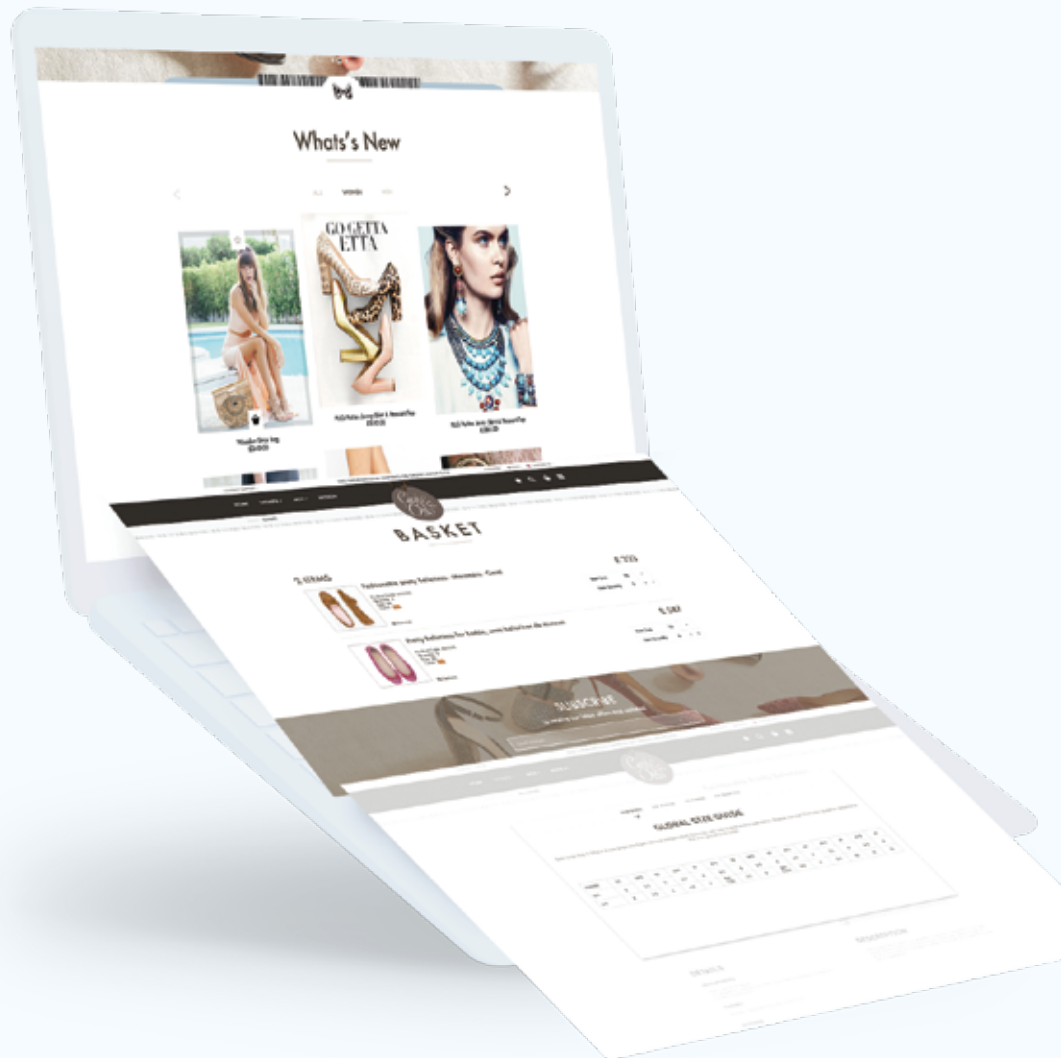

Gigi & Otto

Discover the ultimate mode of E-Commerce

Client Type: E-Commerce
Services: Web-Based Portal
Website: www.gigiandotto.com

App Intro:

GIGI & OTTO is a web-based E-Commerce application that came up with a unique idea of selling products out-of-the-box. A product-centered platform for all the buyers and merchandisers collaborated with the potential growth factories. You can now shop fully loaded products of handcrafted shoes, bags, and other accessories of men and women via GIGI & OTTO. Payment gateways and delivery options are wide open for you, so access the platform and discover some latest trends.

FitCentr

Let's witness a High-Quality fitness regime

Client Type: Wellness
Services: Website
Website: www.fitcentr.com

App Intro:

An application that allows the fitness vendors to come and make grounds on high-end fitness protocols. This app centralizes all the fitness vendors and enthusiasts under one frame by allowing the fitness vendors to showcase their fitness tactics through FitCentr. With this fitness-seeking platform, users can pick a specific training from an array of trainings either on-site or virtual with a specified trainer along with a specified schedule of their choice.
